

CALL FOR PROPOSALS

For the SAKK/BMS Grant for
Pioneering Ideas to Fight Blood Cancer

Application deadline: March 31, 2025

www.sakk.ch

Submit your project now

Many types of blood cancer remain incurable and are associated with severe morbidity and increased mortality. SAKK's HEM Pioneer Grant is funded by an independent donation by Bristol Myers Squibb (BMS), and aims to support projects and research that could potentially pave the way for a game changing outcome in the field of blood cancers.

Key information about the grant

- Grant is endowed with CHF 20 000.–
- Application deadline is March 31, 2025
- Your application must be submitted electronically via events@sakk.ch

You

- are a practicing physician, clinical researcher or professional in a patient care institution/ society
- have your primary place of research in Switzerland
- must finance your project via an institutional bank account

Your project

- intends to pave the way for a potentially game-changing impact in the field of hemato-oncological diseases including their premalignancies
- has an explorative character in the sense of initiatives with preliminary testing of an idea for future initiatives (e.g. clinical studies or translational research, cohort studies, working and patient care models, assessment tools, etc.)
- must not be a basic science project
- may focus on aspects such as treatment approaches, mode of action of drugs, mode of disease, interdisciplinary communication/ collaboration, etc.
- is conducted in Switzerland

Grant winner

An independent jury evaluates all projects and announces the grant winner at the SAKK semi-annual meeting in Interlaken in May 2025 where he/she will be requested to present a short exposé on the planned research. Further notifications about the winning project will be published in the info@ONCO-SUISSE magazine and on the SAKK website.
